WORK EXPERIENCE

Software Developer | Freelance

2022 Dic - 2023 Feb

Development of a mobile application that managed to connect farmers in the sector with the main shipping companies in the sector.

Development: A mobile app was developed in which farmers and merchants can register and create a database that can be called and viewed by users who enter the app and can be contacted thanks to the registration of their data.

Tools: It was developed through Python, Dart, Flutter and Postgrest.

EDUCATION

Holberton School - Software Developer

Project-based training between peers, in order to train developers with backend and frontend concepts and structures. Trained for remote work and environments or virtual environments, developing code skills, logic, teamwork and adaptability.
